

**333 000**

## **WHEELS UNDER WORKHORSE**

The wheels under Workhorse has the same great features as the 330 000 Workhorse but has its wheel set under its frame for a more compact and narrower unit. It uses the same attachments as the regular Workhorse except for the 333 500 gravel spreader which is specifically made for it. Equipped with a GX160 Honda engine, this Workhorse can handle a number of jobs. The gravel spreader attachment will spread large or pea gravel. The dump tray attachment is used for moving debris or material and the hot tank will supply hot asphalt on larger jobs. The GRIZZLY Workhorse has an independent brake and clutch mechanism that can be easily adjusted.

### **OPTIONS**
